Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submissions filed on 9-29-2003 and 5-24-2004 have been entered.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 1-5,7-10 and 13 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter, which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

4. The patentees amended the claims to include the phrase “comprising at least **one resin or wax** component having a first melting temperature of from about 90-100°C, **a second resin or wax component** having a second melting temperature of from about 50-60°C...”

Art Unit: 1773

5. In the specification of the patent, the only description of such a blend is far more limited. It describes a blend of a **pressure sensitive adhesive** having a melting point of 90-100°C and an **olefinic** component having a melting temperature from about 50-60°C. This is a very specific combination of materials. The patentees do not have support for the concept of broadening this to generically include **waxes and resins**. The examiner believes that the patentees have neither conceptual nor literal support for the current amendment.

In the original claim the applicants had the language “at least one resin or wax component”... In the initial set of amended claims, the applicants amended the claims to include “or a mixture there of.” The examiner maintains that the earlier amendment is within the scope of the original disclosure, but the current amendment diverges significantly from the original disclosure.

Response to Arguments

6. Applicant's arguments with respect to claim 1-5,7-10 and 13 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to D. Lawrence Tarazano whose telephone number is (571)-272-1515. The examiner can normally be reached on M-F 8:30AM to 6:00PM (second Friday off).
